Brainstorm & idea prioritization

Our brainstorming sessions allow our team to collaboratively explore ideas, understand real-world flight booking challenges, and shape the concept of **FlightFinder – Navigating Your Air Travel Options** into a simple, reliable, and scalable air travel booking platform—even when team members are not physically present in the same location.

- **10 minutes** to prepare
- **1 hour** to collaborate
- **2-8 people** recommended

Before you collaborate

A little bit of preparation goes a long way with this session. Here's what you need to do to get going.

10 minutes

A Team gathering
The team members (developers and designers) joined the session and discussed the problems people face while booking flights online. We shared our experiences about searching flights, comparing prices, and booking tickets before starting the brainstorming.

B Set the goal
The goal of this session is to solve the problems users face while searching and booking flights. We want to build **FlightFinder** as a simple, easy-to-use, and secure flight booking platform with real-time flight details.

C Learn how to use the facilitation tools
The team followed basic brainstorming rules like sharing ideas freely, not judging others' ideas, listening carefully, and focusing on useful solutions. This helped us conduct the session smoothly and effectively.

1 Define your problem statement

What problem are you trying to solve? Frame your problem as a How Might We statement. This will be the focus of your brainstorm.

5 minutes

Problem

Many people face difficulties while booking flights online. The process is time-consuming, websites to compare prices and check availability. The booking process can also be confusing and time-consuming.

Key rules of brainstorming

To run an smooth and productive session

- Stay in topic.
- Defer judgment.
- Go for volume.
- Encourage wild ideas.
- Listen to others.
- If possible, be visual.

2 Brainstorm

Write down any ideas that come to mind that address your problem statement.

10 minutes

TIP
You can select a sticky note and hit the pencil [switch to sketch] icon to start drawing!

3 Group ideas

Take turns sharing your ideas while clustering similar or related notes as you go. Once all sticky notes have been grouped, give each cluster a sentence-like label. If a cluster is bigger than six sticky notes, try and see if you and break it up into smaller sub-groups.

20 minutes

TIP
Add customizable tags to sticky notes to make it easier to find, browse, organize, and categorize important ideas as themes within your mural.

During this stage, all the ideas generated in the brainstorming session were reviewed and grouped based on similarity. Similar ideas were placed together to clearly understand the main features of the FlightFinder system.

The ideas were grouped into the following categories:

Flight Search & Availability
Ideas related to searching flights, checking real-time availability, and comparing airlines
.

Security & Login
Ideas related to user registration, secure login, and protecting user data.

Booking & Confirmation
Ideas related to booking tickets, viewing booking history, and receiving confirmation messages.

User Experience
Ideas focused on simple design, easy navigation, and filter options (price, time, airline).

Admin/Operator Management
Ideas related to managing flights, updating flight details, and monitoring bookings.

4 Prioritize

Your team should all be on the same page about what's important moving forward. Place your ideas on this grid to determine which ideas are important and which are feasible.

20 minutes

TIP
Participants can use their cursors to point at where sticky notes should go on the grid. The facilitator can confirm the spot by using the laser pointer holding the **H key** on the keyboard.
